

Oscar Alexander Chanax

Quetzaltenango, Guatemala • ochanaxo@gmail.com • +(502) 5561 6246 • alexander-dev.com • [linkedin](https://www.linkedin.com/in/ochanaxo)

Systems Engineer with a Master's Degree in Information Security and a strong track record in scalable software development. Expert in modern architectures (Hexagonal, Microservices) and cybersecurity. Demonstrated success in leading frontend development (React Native) and building scalable backend services (NestJS, Event-Driven) for high-demand fintech applications such as Zigi App. Adept at accelerating Time-to-Market through CI/CD pipeline automation and the implementation of Clean Code standards, directly impacting thousands of active users.

PROFESSIONAL EXPERIENCE

Zigi App - Banco Industrial

Senior FrontEnd Developer

Guatemala City

Febrero 2026–Presente

- Designed and implemented financial microservices using NestJS and TypeScript, applying Hexagonal Architecture, Domain-Driven Design (DDD), and CQRS principles to ensure highly maintainable and scalable code.
- Developed event-driven architectures for asynchronous and decoupled inter-service communication, implementing AWS solutions using EventBridge, SQS, and SNS.
- Managed cloud-native infrastructure and security, deploying services on AWS EKS (Kubernetes) and securing endpoints via AWS WAF, API Gateway, and Lambda Authorizers.
- Authored technical definitions and documentation (High-Level Design - HLD, Architecture Decision Records - ADR) for the creation of new core fintech services, leveraging developer portal tools (Backstage) and cross-cutting libraries to accelerate Time-to-Market.
- Ensured platform quality and stability through the strict implementation of unit testing (Jest) and rigorous adherence to Clean Code and cybersecurity standards within a high-demand financial environment.

Senior FrontEnd Developer

Febrero 2024–2026

- Lead the technical development and UI architecture for a market-leading financial application, utilizing React Native and MobX to ensure peak performance.
- Design and implement security protocols within core flows, reducing fraud incidence and achieving a 15% reduction in operational losses.
- Optimize user retention by strategically integrating SDKs like MoEngage for personalized communications, increasing retention rates by up to 30%.
- Ensure product scalability by applying Clean Code principles and providing technical mentorship to the development team.
- Streamline the handling of complex forms and business-critical validations using React Hook Form and Axios, significantly improving client-side data processing efficiency.
- Evaluate and select the technology stack for new modules, prioritizing long-term maintainability and information security.
- Advise on technical architecture committees for new modules, guaranteeing resilient and scalable designs based on industry patterns (Hexagonal and Microservices) to ensure future-proof maintainability.

- Led the modernization of the "Procure-to-Pay" process for corporate clients, enhancing administrative efficiency through custom-built software solutions.
- Developed and deployed robust APIs using NestJS and GraphQL, optimizing backend service response latency for critical business processes.
- Implemented efficient storage architectures using SQL and Redis, achieving substantial improvements in high-volume data processing.
- Collaborated on the design of cross-platform mobile applications (React Native), ensuring a seamless and consistent user experience.
- Established quality standards through rigorous code reviews and technical mentorship for junior developers.
- Participated in critical architectural decision-making for new modules, reducing technical rework and infrastructure costs through the standardization of scalable components

- Manage the full software development life cycle (SDLC) for international clients, utilizing an advanced stack including Next.js, Python/Django, and Flutter.
- Automate deployment processes via CI/CD pipelines on AWS and Digital Ocean, reducing delivery times for new features and updates.
- Consult on the implementation of secure infrastructures and resilient architectures to solve complex business challenges.

EDUCATION

Mariano Gálvez University <i>Master of Science in Information Security</i> Cum Laude Distinction	Quetzaltenango, Guatemala <i>November 2023</i>
Mariano Gálvez University <i>Bachelor's Degree in Systems Engineering and Computer Science</i>	Quetzaltenango, Guatemala <i>November 2020</i>

CERTIFICATIONS

- AWS Certified Cloud Practitioner *December, 2025*

ADDITIONAL SKILLS

- **Core Stack:** TypeScript, JavaScript, Python, PHP, Dart, Go.
- **Frameworks & Libraries:** React (Native/JS), Next.js, NestJS, Angular, Flutter, Django, MobX, Redux, GraphQL (Apollo).
- **Infrastructure & DevOps:** AWS, Digital Ocean, Docker, CI/CD (GitHub Actions), Nginx.
- **Databases:** PostgreSQL, MySQL, Redis, MongoDB.
- **Testing:** Unit Testing with Jest.
- **Languages:** Spanish (Native), English (Intermediate - B1/B2).
