

Oscar Alexander Chanax

Senior Backend Engineer

Quetzaltenango, Guatemala • ochanaxo@gmail.com • +(502) 5561 6246 • alexander-dev.com • [linkedin](#)

Senior backend engineer with 5+ years building high-demand fintech products. Currently designing core financial microservices at Zigi App (Banco Industrial), a digital wallet with 1.3M users and ~160K daily actives. Specialist in NestJS/TypeScript, Hexagonal Architecture, DDD, CQRS and event-driven systems on AWS (EventBridge, SQS/SNS, EKS). M.Sc. in Information Security (Cum Laude): I build systems that are scalable and secure by design. AWS Certified Cloud Practitioner.

PROFESSIONAL EXPERIENCE

Zigi App — Banco Industrial

City, Guatemala

Senior Backend Developer

February 2026 – Present

- Design and implement core financial microservices in NestJS/TypeScript applying Hexagonal Architecture, DDD and CQRS, powering a platform with 1.3M registered users and ~160K daily active users.
- Build event-driven, asynchronous communication between services on AWS (EventBridge, SQS, SNS), deploying on EKS (Kubernetes) and securing endpoints with AWS WAF, API Gateway and Lambda Authorizers.
- Act as lead backend developer of the squad: own technical definition of new core services (HLD, ADRs) using Backstage and shared internal libraries, accelerating time-to-market.
- Introduced AI-assisted development practices (context engineering) adopted by the team, speeding up delivery of new services.
- Ensure quality and stability through unit testing (Jest), Clean Code and cybersecurity standards in a regulated financial environment.

Senior Frontend Developer

February 2024 – February 2026

- Led the technical architecture of the mobile frontend (React Native + MobX), sustaining a 0.93 overall performance Apdex in production for 1.3M users.
- Designed and executed security protocols in critical flows, achieving a 15% reduction in fraud-related operational losses.
- Integrated the MoEngage SDK for personalized engagement, improving user retention by up to 30%.
- Mentored developers and delivered tech talks to the ~100-person technology org: React Hook Form in React Native, local dev tooling, AI context engineering.
- Represented the squad in architecture committees, evaluating stacks and patterns (Hexagonal Architecture, Microservices) for new modules.

Ciancoder (GT) / Enapsys (MX)

Guatemala – Mexico

Full Stack Developer

February 2021 – February 2024

- Led the modernization of the procure-to-pay process for corporate clients, improving administrative efficiency through custom software.
- Designed and deployed scalable APIs with NestJS and GraphQL, reducing response latency for critical flows.

- Implemented efficient storage architectures with SQL and Redis for high-volume data processing.
- Set quality standards through code reviews and mentoring of junior developers; contributed to architecture decisions that reduced rework and infrastructure costs.

Independent / Freelance Developer

Remote

Full Stack Developer

November 2020 – Present

- Manage the full lifecycle of web and mobile applications for international clients (Next.js, Python/Django, Flutter).
- Automate deployments with CI/CD pipelines on AWS and Digital Ocean, reducing feature delivery times.
- Advise on secure infrastructure and resilient architectures for complex business problems.

TECHNICAL SKILLS

Backend: TypeScript, Node.js, NestJS, GraphQL, REST, Python/Django, PHP

Architecture: Hexagonal Architecture, DDD, CQRS, Event-Driven, Microservices

Cloud & DevOps: AWS (EKS, EventBridge, SQS/SNS, API Gateway, WAF, Lambda), Docker, CI/CD (GitHub Actions), Digital Ocean, Nginx

Frontend & Mobile: React / React Native, Next.js, MobX, Redux, Flutter, Angular

Data: PostgreSQL, MySQL, Redis, MongoDB

Quality & Security: Jest (unit testing), Clean Code, application security, AWS WAF, Lambda Authorizers

Applied AI: AI-assisted development & context engineering (Claude Code and similar tooling)

Languages: Spanish (native), English (professional working proficiency, B2)

EDUCATION

M.Sc. in Information Security — Cum Laude

November 2023

Universidad Mariano Gálvez — Quetzaltenango, Guatemala

B.Sc. in Systems Engineering & Computer Science

November 2020

Universidad Mariano Gálvez — Quetzaltenango, Guatemala

CERTIFICATIONS

- AWS Certified Cloud Practitioner

December 2025
